

Respiratory Virus Season is Here!

You don't have to let the flu take over your household!

Get you and your children the flu vaccine to save frustration and worry this season.

Did you know?

The flu is very contagious, especially in the fall and winter because we're spending more time inside.

The flu can spread quickly, especially in homes where one or more children attend daycare or school.

Make a Vaccination Appointment Today!

Flu vaccines are recommended for everyone 6-months and older, every year, to better protect against new flu viruses!

Fight the Flu with a Flu Vaccine!

The flu vaccine can make your child's illness milder and easier to manage if they do get sick!

That means...

- > **Less days** away from school
- > **Less catch-up work** for your kids when they get back
- > **Missing fewer** days of work
- > **Less risk** of lost wages
- > **Reduced risk** for urgent and expensive childcare or medical care

Vaccines help strengthen your child's overall immune system!
