

Introducing ICAAP's New Flu Media Packet for Patients & Providers

Hello ICAAP Members and Partners!

We are pleased to introduce our flu vaccine media packet, which includes informative flyers for both patients and providers. This packet can be used to educate patients about the importance of flu vaccines, answer frequently asked questions, and provide resources related to flu vaccines. Our goal is to help reduce vaccine preventable illnesses.

The flyers created for providers and staff summarize current recommendations and resources, promote uptake methods such as conducting reminder recalls, and share evidence-based tips on communicating information about vaccines.

We encourage you to prominently display these flyers in your exam rooms, patient waiting areas, and staff spaces. Please also visit illinoisaap.org to download companion social media graphics you can share on your various platforms and digital versions of all of the enclosed flyers.

Thank you for your unwavering commitment to promoting good health.

With Gratitude,

The Illinois Chapter, American Academy of Pediatrics
