

Illinois Follows the American Academy of Pediatrics (AAP) **Immunization Recommendations**

Protecting Your Child with Proven Science

- **Ideal timing and spacing** of giving immunizations for children as their immune system develops
- **Based on the latest evidence** for what is important to protect children
- **No one can predict** which children will get very ill from vaccine preventable diseases, so skipping or delaying vaccines is risky
- The AAP's recommended immunization schedule is endorsed by **1+ million health care professionals**

Your pediatrician is your trusted partner in your child's health.
