PEDIATRIC ADHD QUALITY IMPROVEMENT PROJECT

In partnership with the AAP and IDPH, ICAAP will host a 5-month learning collaborative and quality improvement (QI) project focused on pediatric ADHD for practice teams. The goal of this project is to achieve measurable improvements in pediatric ADHD diagnosis and follow-up care in patients 4-18 years old in primary care. Teams will work to standardize screenings, history intake, and/or assessment for co-occurring conditions; medication follow-up; and ADHD management education amongst patients with a confirmed or suspected ADHD diagnosis using quality improvement tools.

$1,000 stipends are available for team participation*

Project Requirements

- Must register practice teams to participate. Engage multiple pediatricians, clinical staff, and administrative team members.
- Practices must provide primary care to patients 4-18 years old in Illinois.

Attend Virtual Sessions

And actively participate. Wednesdays 8 to 9am: 12/16/2026, 1/27/2027, 2/24/2027, 3/31/2027, 4/28/2027.

Submit Data

Complete monthly de-identified retrospective chart reviews and PDSA (Plan, Do, Study, Act) worksheets.

Complete Evaluations

To receive American Board of Pediatrics Maintenance of Certification (MOC) part 4 points and CME, if eligible.

Benefits of Participation

- Increase knowledge regarding best practices for ADHD diagnosis and follow-up.
- Improve and standardize processes and monitoring protocols for ADHD.
- Network and problem-solve with others.
- Earn MOC Part 4 points and CME credit.**
